

Lift Core

ADVANCED LIFT & ESCALATOR SOLUTIONS

Engineered to meet modern building needs with a strong focus on safety, comfort, and durability.

**COMPANY
PROFILE**

About Us

We are a professional vertical transportation solutions company specializing in the supply, installation, modernization, and maintenance of a comprehensive range of lifts and mobility systems. With a strong commitment to safety, quality, and innovation, we cater to residential, commercial, industrial, and public sector projects. Our expertise ensures smooth project execution, reliable performance, and long-term customer satisfaction.

VISION

To become a trusted leader in vertical transportation by delivering safe, efficient, and technologically advanced mobility solutions.

We aim to set industry benchmarks through innovation, quality craftsmanship, and an unwavering commitment to customer satisfaction across all sectors we serve.

MISSION

To provide high-quality lift and escalator systems supported by skilled professionals, modern technology, and reliable after-sales service, ensuring maximum safety and customer satisfaction.

PASSENGER LIFT

Passenger lifts provide safe, smooth, and comfortable movement of people between floors in residential and commercial buildings. Designed with advanced safety features and refined engineering, they ensure reliable performance, quiet operation, and enhanced passenger comfort every day.

ESCALATOR

Escalators enable continuous movement of people in high-traffic areas such as malls, airports, and public buildings. Designed for durability and efficiency, they ensure smooth, safe, and uninterrupted passenger flow even during peak hours.

FREIGHT ELEVATOR

Freight elevators are designed to carry heavy goods and materials with strong cabins and high load capacity for industrial use. Engineered for durability and strength, they ensure safe, efficient, and reliable transportation of loads in factories, warehouses, and commercial facilities.

HOME LIFTS

Home lifts are compact systems for private houses, improving convenience and accessibility while using minimal space and energy. Designed to complement modern interiors, they offer quiet operation, smooth travel, and enhanced safety for everyday residential use.

DUMBWAITER

Dumbwaiters transport small goods like food and documents efficiently between floors in commercial spaces. Designed for smooth and reliable operation, they improve workflow efficiency while saving time and reducing manual handling.

CHAIR LIFT

Chair lifts help elderly and mobility-challenged users move safely up and down staircases. Designed with advanced safety features and comfortable seating, they provide reliable, smooth, and user-friendly operation for everyday independence.

CAR LIFT

Car lifts safely transport vehicles between floors in parking facilities, showrooms, and service centers. Designed with high load capacity and advanced safety systems, they ensure smooth, stable, and secure vehicle movement.

PANORAMIC LIFT

A Panoramic Lift is a stylish and modern elevator designed with glass panels that provide a wide, unobstructed view while traveling between floors. It enhances the architectural appeal of a building while offering smooth, safe, and comfortable vertical transportation.

EXTERNAL LIFT

An External Lift is an elevator system installed on the outside façade of a building, providing vertical access without major internal structural modifications. It is a practical and cost-effective solution for existing buildings, renovations, or accessibility upgrades.

SUPPLY & INSTALLATION

We supply and install a complete range of advanced vertical mobility systems tailored to project-specific needs.

REPAIR SERVICES

Lift Core provides fast, dependable, and professional repair solutions for all types and brands of elevators and escalators.

PREVENTIVE MAINTENANCE

Our preventive maintenance programs help extend the lifespan of equipment while ensuring consistent, trouble-free performance.

SUBCONTRACT INSTALLATION SERVICES

We support contractors by providing professional subcontract installation services for lifts and escalators. Our services include complete installation support.

Why Choose Us

Complete range of vertical transportation solutions • Customized systems to match project requirements • Skilled and experienced technical team • Strong commitment to safety and quality • Reliable after-sales and maintenance support

As a complete vertical transportation solutions provider, we are dedicated to moving people and goods safely, efficiently, and comfortably. Our focus on quality, safety, and service excellence makes us a dependable partner for projects of any scale.
